

Matheus Malfi Gonzaga

Developer front-end | HTML | Typescript | CSS | Tailwind

13/12/2002, Jardim Santo Alberto, São Paulo, SP | (11) 999497050 |

matheus.malfi@icloud.com

About

Developer with 1 year and 8 months of experience, seeking a junior front-end opportunity.

GitHub: <https://github.com/MatheusMalfi>

LinkedIn: <https://www.linkedin.com/in/matheusmalfigonzaga>

Knowledges

Development of CRUD applications or tables using HTML, CSS/Tailwind, and TypeScript.

Integration of backend routes into the frontend through “services”, creation of functions for buttons, filters or charts, data concatenation for display on screen, error handling, and page redirection.

Developed a university project at the Municipal University of São Caetano do Sul (USCS) called “StockControl”. The system is an inventory management tool focused on NGOs, aiming to support electronic waste disposal and generate revenue for the organization. I was responsible for the entire frontend of the project, but also gained significant experience with the database (MySQL) and backend (JavaScript).

Experience

Team Coordinator.

Arteres Indústria e Comércio LTDA – August 2021 – November 2021

Responsible for the screen-printing department, where plastic and fabric materials were printed.

DG Soluções Estratégicas – May 2023 – September 2023

Responsible for the company’s sales department, prospecting potential clients and contacting them by phone to schedule meetings and better present our product.

Clik Softhouse – Intern – October 2024 – June 2026

- Development of the “home” page, plus two additional screens to display videos to system users through integration with “Loom”, with access level control, responsive mobile layout, and error message handling on screen.

- Development of new data cleaning processes, input handling, and database integrations.
- Enable or disable the visibility of specific menus for requesting companies.
- System layout adjustments, improving responsiveness across multiple sections.

Education

High School Diploma – Colégio Objetivo Senador Fláquer – January 2016 – December 2019

Foreign Trade – Universidade São Judas Tadeu (USJT) – January 2020 – December 2022

Analysis and Systems Development – Municipal University of São Caetano do Sul (USCS) – January 2024 – July 2026

Experience with the following programming languages: JavaScript, Java, C, and Flutter.

Developed the “StockControl” project in the first semester, delivering a fully functional system including frontend, backend, and database.

Learned HTML for page structure, JavaScript programming, and responsive design using CSS for mobile devices.

Languages

Portuguese – C2 level

English – B2 level

Extracurricular Courses

Alura:

- ❖ AI: exploring the potential of generative artificial intelligence
- ❖ Software engineering in the AI era: how to use AI in real development workflows

Microsoft Office:

- ❖ Office Package from beginner to advanced

AWS:

- ❖ AWS Academy Graduate Certificate – Cloud Foundations – Training Badge
- ❖ Introduction to Cybersecurity
- ❖ Network Addressing and Basic Troubleshooting
- ❖ Basic Networking Concepts
- ❖ Network Devices and Initial Configuration

- ❖ Network Support and Security
- ❖ IT Fundamentals: Hardware and Software
- ❖ Implementing and Managing Databases
- ❖ Networking Career Path
- ❖ Network Technician Career Plan
- ❖ Data Modeling
